

Zimbra

Professional Hosted Email Solution

The Problems with legacy & outdated email systems

Decades-old technologies not built for today's work

- Hundreds of emails per day
- Thousands of emails in inbox
- Complicated multi-party meetings

Unsecure Data

- Not backed up in the cloud
- Not portable from device to device
- Potential for data loss on devices

Common activities are awkward or poorly integrated

- Can't find people
- Can't link tasks to email and meetings
- Can't coordinate resources around documents

Problems Cont.

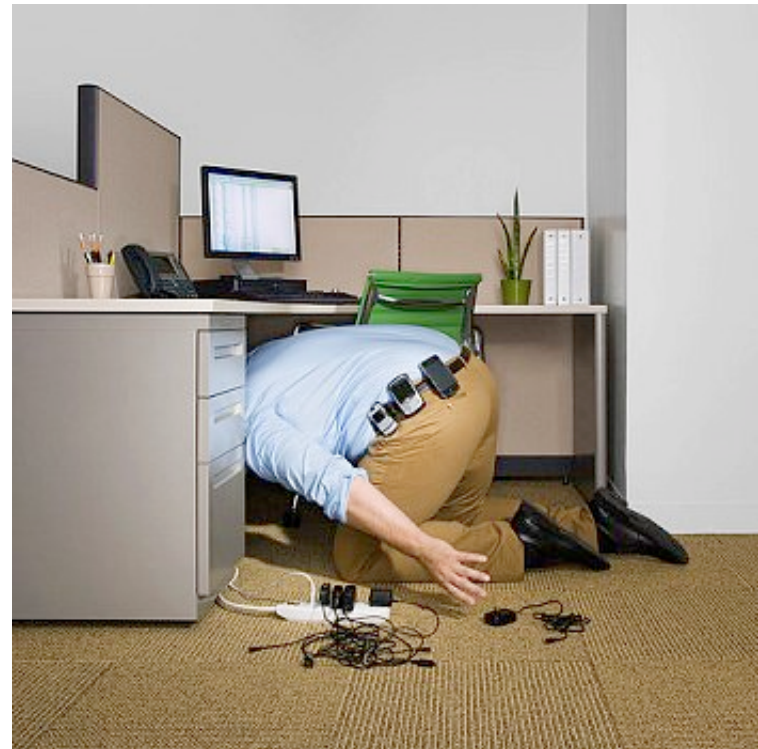

MS Exchange causing you these problems?

Client-side is very costly to manage

- IT helpdesk filled with .pst issues
- Plug ins are hard to roll out across 1000's of users

First-gen email servers require armies of administrators

- Hard to install
- Hard to update
- Hard to scale
- Hard to keep running

Non-portable applications create management headaches

- Tied to on-premise deployments – impossible to move to the cloud or vice versa

The Answer is:

Zimbra Collaboration Server (ZCS)

Zimbra Collaboration Server supports end-user access from PCs, Macs, mobile devices and Web browsers.

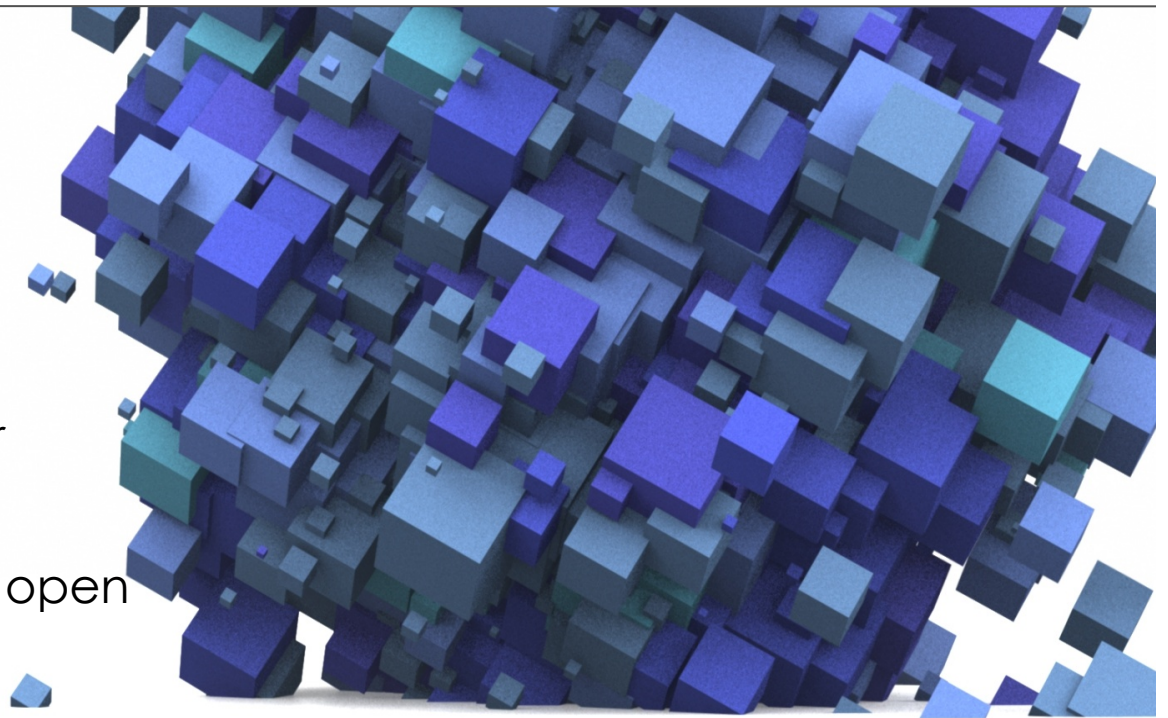

VMware Zimbra® Collaboration Server (ZCS) is a next-generation email, calendar and collaboration. ZCS provides an open platform designed for virtualization and portability across private and public clouds, making it simpler to manage and more cost-effective to scale. With the most innovative Web application available, ZCS boosts end user productivity on any device or desktop - any time, any place - at dramatically lower costs compared to other providers.

Zimbra

A little background

- Zimbra started as an open sourced email project in 2003
- Bought by Yahoo! for 350 million in 2007
- Acquired by VMware in 2010
- Experienced 80% growth year after year
- Currently, the fastest growing open source email server in the world

Zimbra

is in 200,000 organizations and growing...

OSSDS:

As your Zimbra Hosting Provider

We help organizations leverage the power of ZCS by providing:

- Dramatically reduced IT costs
- Peace of mind that your data is secure
- Software and performance updates automatically managed by OSSDS
- And, turn slide...

Email access

any time, any where, on any device

OSSDS Zimbra Hosting

Bringing email to the private & public cloud

The Zimbra Advantages

Productivity

Enhances user **productivity** by **streamlining** the interaction between **people, applications & data**

Openness

Provides an **open** and **extensible** collaboration platform that promotes universal **access** to **applications & data**

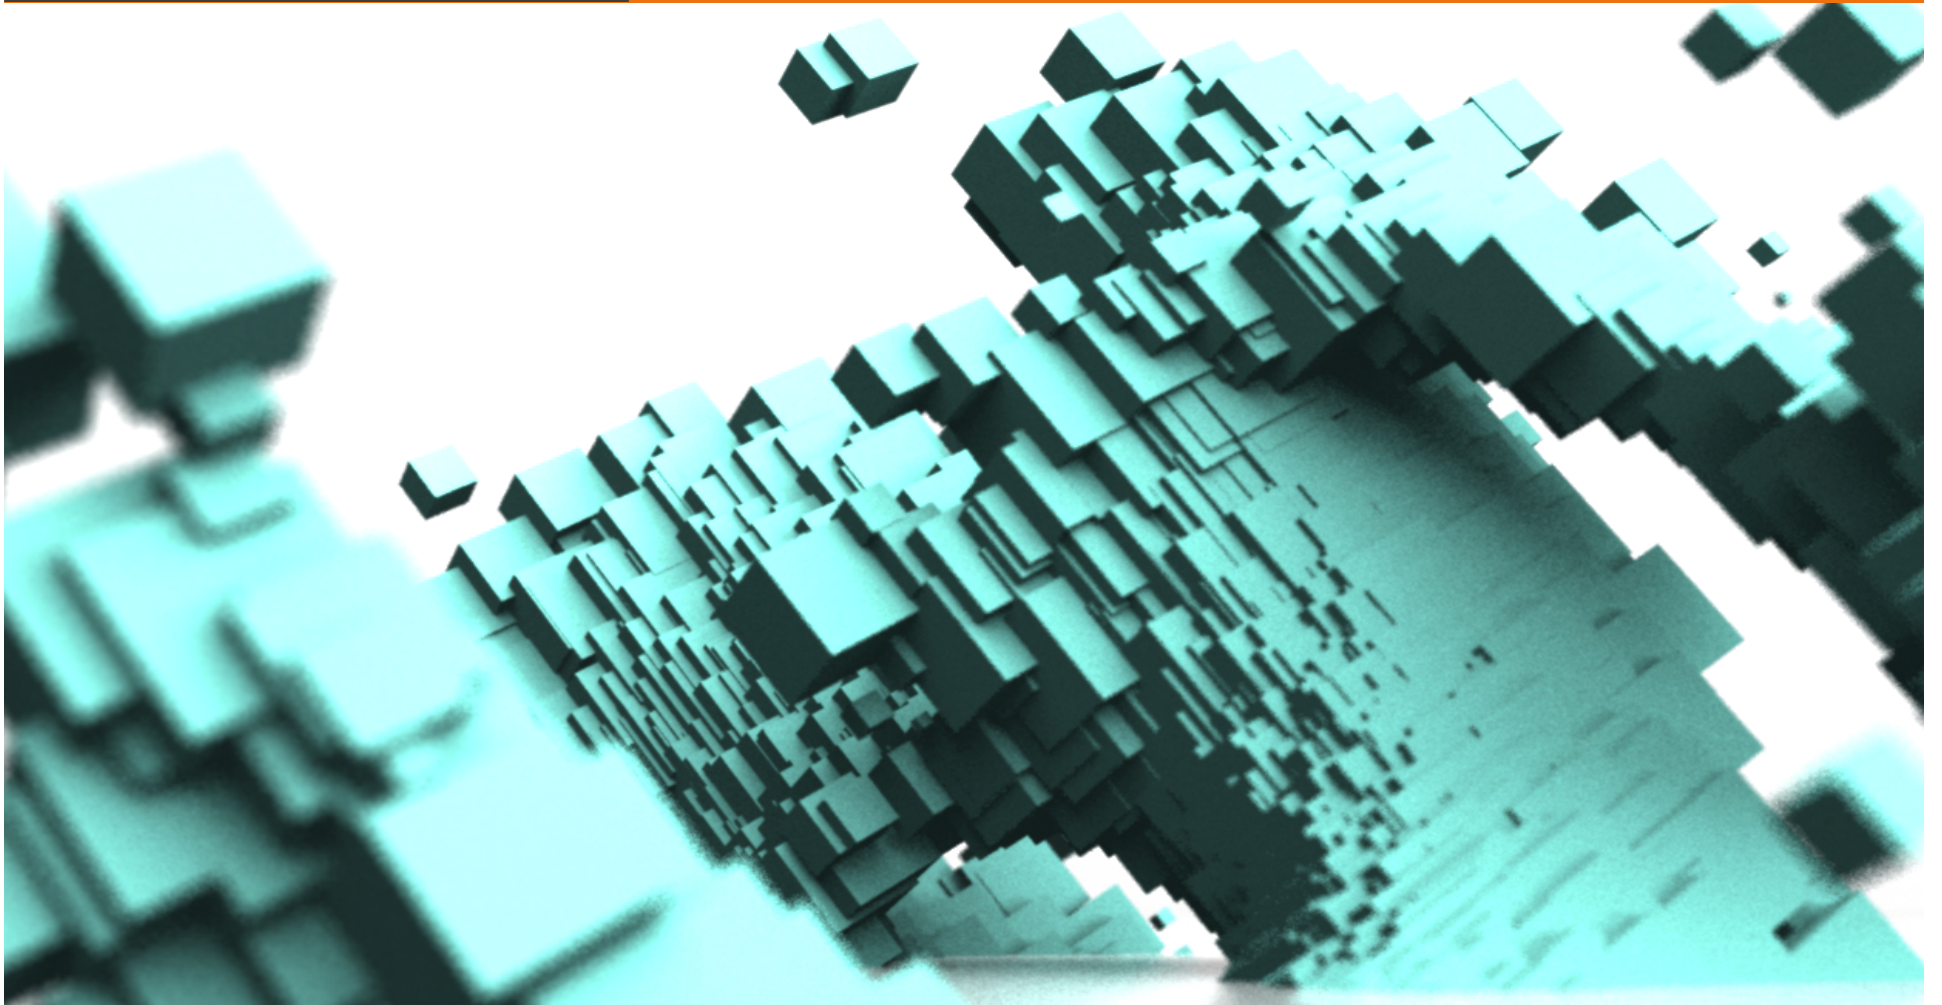

Manageability

Simplifies platform **management**, reduces administration **costs** and embraces **portability** across **Private & Provider Clouds**

Zimbra

Features and screenshots

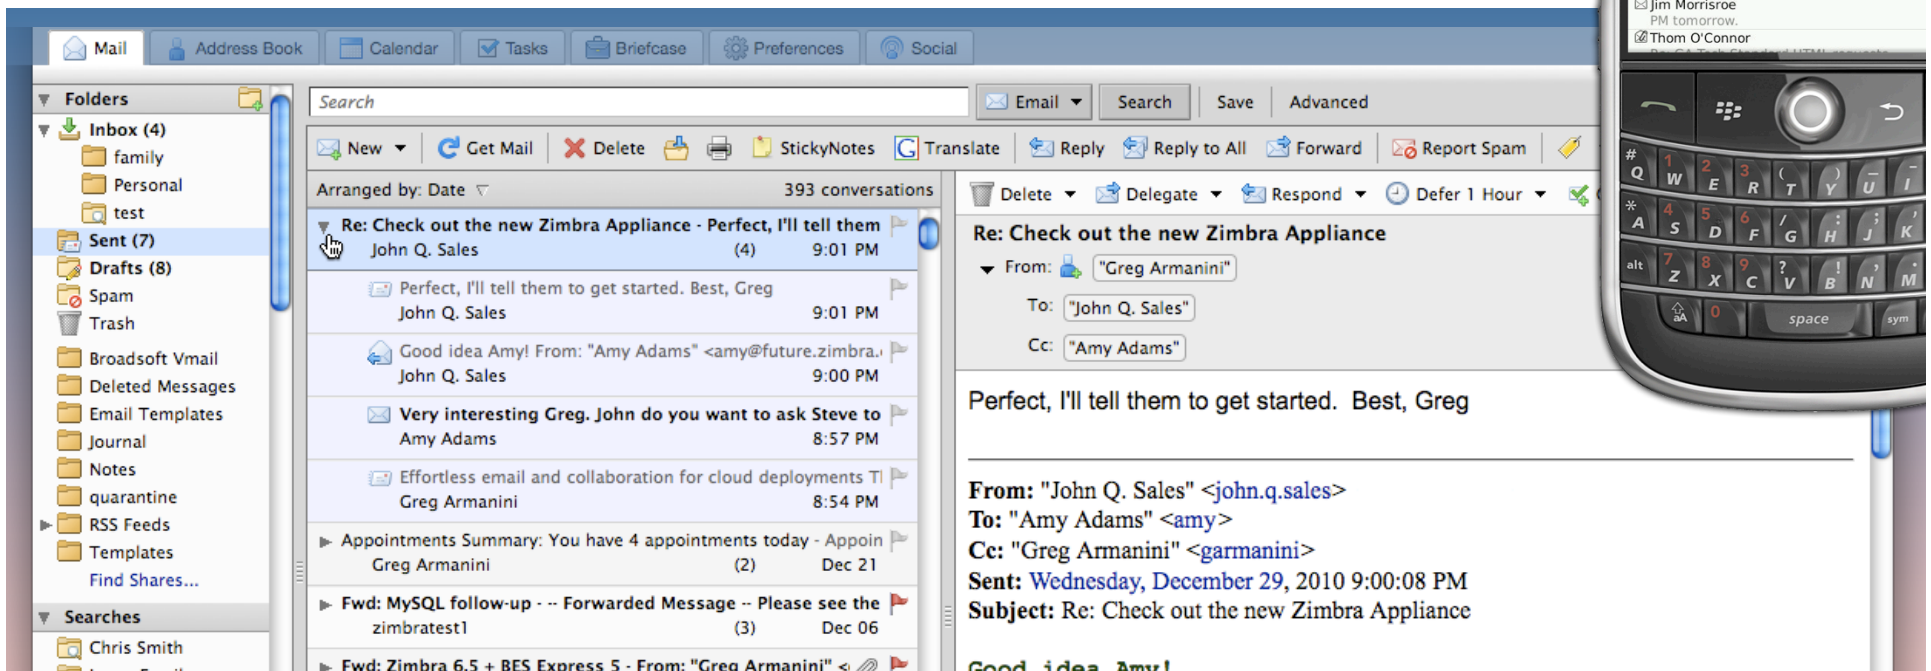

Zimbra

Email & Collaboration

Web application surpasses traditional email client capabilities

- Conversations and Tagging
- Fast, search-based inbox
- More efficient management of larger inboxes, quotas
- Cross-platform
- Offline access with Zimbra Desktop

Mobile and Desktop sync

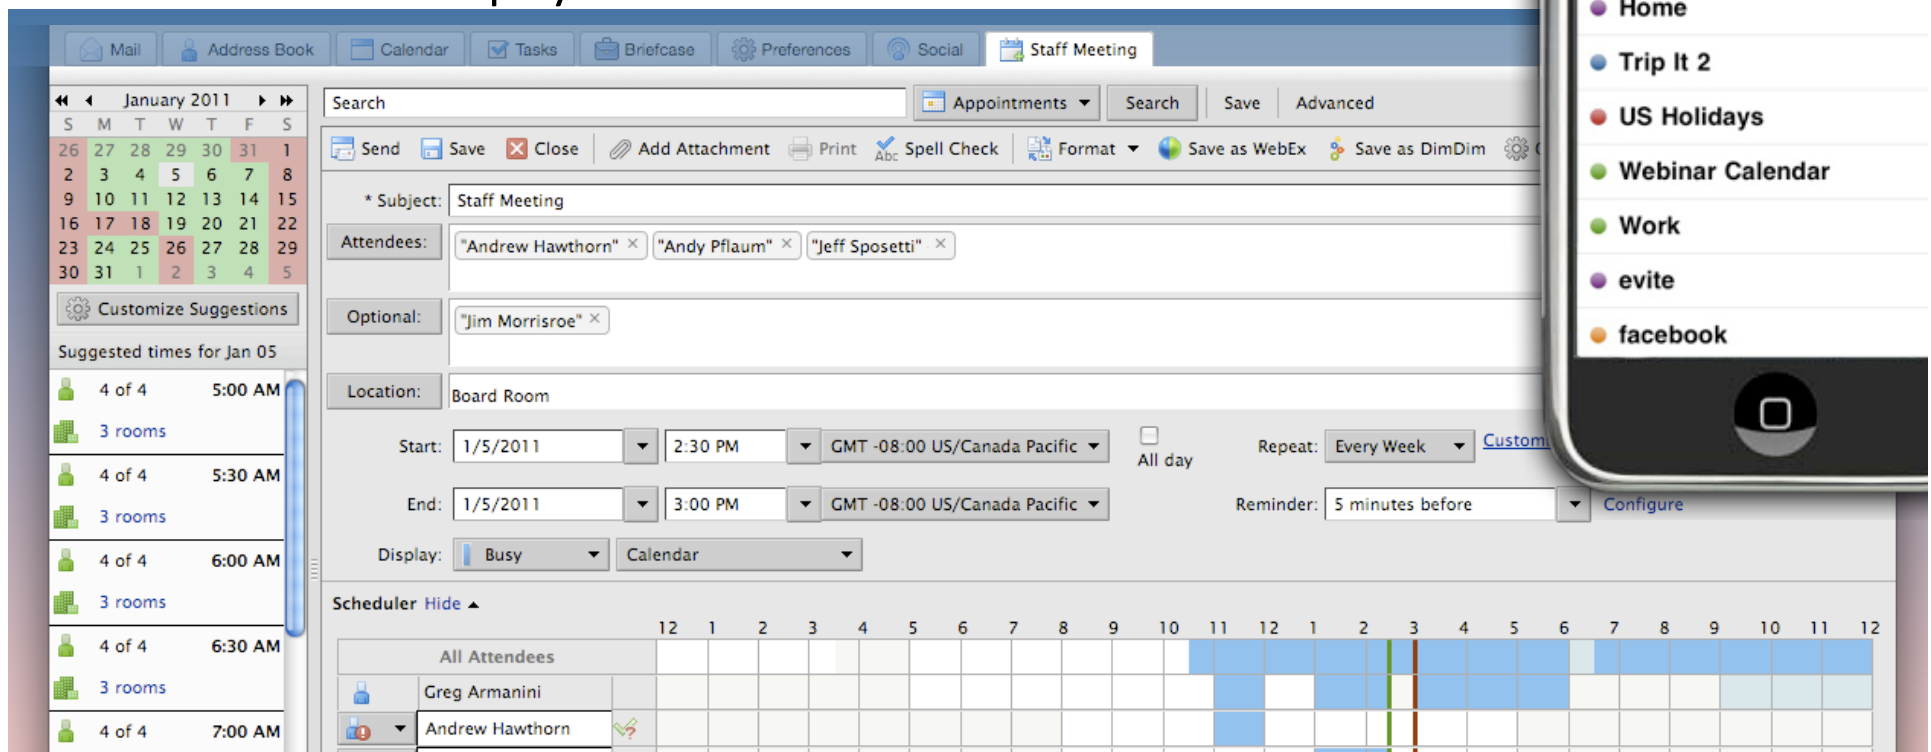

Advanced web-based calendar

- Manage multiple schedules
- Peer free-busy lookup, resources and rooms
- Easy sharing and full schedule delegation

MS Outlook and Exchange interoperability

Mobile and Desktop sync

The screenshot displays the Zimbra web interface for creating a calendar event. The top navigation bar includes links for Mail, Address Book, Calendar, Tasks, Briefcase, Preferences, Social, and a 'Staff Meeting' tab. The main content area shows a form for creating a 'Staff Meeting' event. The form includes fields for Subject, Attendees (Andrew Hawthorn, Andy Pflaum, Jeff Sposetti), Optional (Jim Morrisroe), Location (Board Room), Start/End times (1/5/2011, 2:30 PM to 3:00 PM), Repeat (Every Week), and Reminder (5 minutes before). A 'Scheduler Hide' section at the bottom shows a grid view of the event for all attendees, including Greg Armanini and Andrew Hawthorn.

On the right side, a mobile device displays the Zimbra mobile app interface. The app shows a list of calendars: Armanini Family, Calendar, Events, Home, Trip It 2, US Holidays, Webinar Calendar, Work, evite, and facebook. The device status bar at the top shows AT&T, 9:50 AM, and signal strength.

Zimbra

Briefcase, Document Sharing, Collaboration

Integrated file management and location-independent storage

- Easily share files and jointly manage with peers
- Check in/out all file types with version control

More efficient, intuitive day-to-day collaboration

- Share and delegate access to Inboxes, Contacts, Schedules, Folders
- Publish publicly or to internal groups
- Email workflow integration

The screenshot displays the Zimbra Briefcase web interface. On the left, a sidebar shows a folder tree with 'Briefcase', 'Notebook', 'School Policies', 'Trash', and 'Zimlets'. The main area is divided into a file list on the left and a document preview on the right. The file list shows a folder 'CAR.docx (4)' containing four versions. The selected version is '#4: Final version for Science Fair' by 'garmanini', dated '12/23/2010', with a size of '6 MB'. A context menu is open over this file, showing options: 'Download', 'Edit', 'Send link(s)', 'Send as attachment(s)', 'Create Slide Show', 'Check In File' (highlighted), 'Discard Check Out', 'Tag File', 'Delete', and 'Move'. The document preview on the right shows the 'CAR.docx' document, dated 'December 23, 2010 2:29 PM by garmanini'. It includes a title 'CAR: LEGO RAMP RACER #1' and a table with the following data:

1	Base weight	100G
2	Weight with penny roll	356G
3	Weight with penny and quarter rolls	548G

Below the table is a diagram of a ramp with a car at the top. To the right of the table is a photograph of a LEGO ramp racer on a ramp.

Extensible

Frameworks and Workflows

- Zimlets enable 3rd party web services and new applications to be integrated directly in Zimbra
- Customers and partners may develop their own or use existing from the open source community
